DORMOIS, LLP IMPLEMENTS THE AMCIS EMR FROM M.D. WEB SOLUTIONS: ACHIEVES A RETURN ON INVESTMENT IN 6 MONTHS

Tampa, FL - August 15, 2007

M.D. Web Solutions today announced that Dormois, LLP, serving Tampa, Florida and the surrounding areas, has implemented M.D. Web Solutions' AMCIS Electronic Medical Record and has achieved a Return On Investment (ROI) in just 6 months.

Dormois, LLP is a single physician Cardiology practice including 4 office personnel. The practice conducts approximately 4,500 patient visits per year and provides services such as Exercise stress testing, Thallium exercise testing, EKG, Stress Echocardiography, Holter monitoring, Event monitoring, 24-hour Blood Pressure monitoring, Anticoagulant monitoring, Advanced Lipid testing, Cardiac Catheterization, Stent Placement, Electrical Cardioversion and Pacemaker follow-up.

According to Dr. John Dormois, "I continue to see the same number of patients, but I complete my work with an extra hour to spare each day. I use that time to provide more echocardiogram consults."

"We're pleased to have concrete evidence that, even at the single-physician practice level, AMCIS has a proven ROI," noted Cyril Spiro, MD, MBA, General Manager and Founding Partner of M.D. Web Solutions. "Dr. Dormois is a leader in his field, demonstrating that independent physicians can use AMCIS as a tool to improve the bottom line and stay competitive while providing excellent patient care."

M.D. Web Solutions AMCIS employs an exclusive clinical-based logic engine to deliver patient specific information to physicians when it is needed most. The product optimizes patient interaction through secure web based technologies, concurrently generating information for the electronic medical record.
